- Adjustable Rear Guide Runners (4)
- Hydraulic Wing
- Wing Rubber Flap
- Rubber Pan Flap
- AR400 Pan ilo Standard
- AR400 on Ski and Rails
- Heavy Duty Rear Axle with 8-bolt hub and LT225-75-R16 Tire
- Manual Parking Stand ilo Ski
- Hydraulic Parking Stand ilo Ski
- Sign Bracket–Custom Sizes Available

Pizza Cutters

5th Wheel Hitch

Sign Bracket

## —BENEFITS—

### Durability

When not building the Ultimate Groomer Drag our employees are manufacturing heavy duty snowplows, wings and underbody scrapers. Our Groomer Drags have additional 2”x 4” tubing that provide additional strength that many other manufacturers may not provide. Ultimate has extra bracing at critical points and additional mounting plates at the connection sites.

### Smooth Cutting

The design of the Ultimate Groomer Drag creates a user friendly and effective grooming experience. The laid-back angle of the 5 cutting edges provide a clean cut without jumping or chattering which may leave a compromised trail. The hydraulic ski has the ability to make “good operators” into “great operators” by finding the ideal grooming setting and being able to relocate with ease after stiff hitching obstacles.

### Fit & Finish

UTE is very proud of its fit and finish of the final product that we provide. We ensure that all equipment that leaves our manufacturing shop is the highest quality. All equipment is inspected and tested to ensure that it functions correctly once the customer receives it.

COMBINING OUR 40 YEARS  
EXPERIENCE OF MANUFACTURING  
PREMIUM HIGHWAY SNOW  
REMOVAL PRODUCTS AND OUR  
PASSION FOR SNOWMOBILING,  
WE ARE PROUD TO OFFER A  
SNOWMOBILE TRAIL GROOMER TO  
WITHSTAND THE TOUGHEST MID-WEST  
WINTER AND LEAVE YOU WITH MILES OF  
SMOOTH SNOWMOBILE TRAILS.

Building on the legendary Ultimate Snow Groomer platform, Universal is making grooming snowmobile trails easier than ever! With the ski design sensing height changes on the trail and reducing bounce and blade chatter, the Ultimate Snow Groomer Drag takes on the toughest snowmobile trails in the USA. The groomer blades on the Ultimate Snow Groomers Drags are angled and positioned for increase flow of snow, cutting of moguls and easier pulling. The groomer blades are also spring loaded and allow the blade to “trip” over any obstacle too big. The result is efficient and effective winter trail grooming equipment.

# Ultimate SNOW GROOMER DRAGS

# ULTIMATE SNOW GROOMER DRAG

The Ultimate Groomer Drag is designed to be pulled behind a tow unit to effectively groom snow trails. It comes in many sizes ranging 8' to 12'6" wide in the base design that has a 20' long snow processing area. We differentiate ourselves from the competition by building our snowmobile trail groomer drag with tilted side rails to create strength throughout the entire drag. We have additional 2" x 4" internal tubing that provides additional strength that many other manufacturers may not provide. We also have our cutting blades tilted back to create a smoother pull without the blade chatter of others – this theory is relative to the design of a grader blade. Lastly, the Ultimate Groomer Drag offers the hydraulically controlled ski to smooth out the ride of the drag and offer the ability to find and maintain your sweet spot throughout the grooming process. We offer many options to customize the Ultimate Groomer drag to meet customer's needs.

## Features & Specifications

- SKI DESIGN senses bottom of hills & bridge holes reducing bounce and blade chatter
- Stiff Hitch w/ Rubber Puck to absorb shock
- Blades angled & positioned for increased flow of snow, cutting of moguls & easier pulling
- 5 Cutting Blades are Spring Loaded and have greaseable pivot points
- Slow Moving Vehicle Sign
- 2" x 4" center construction, 4 center tubes
- 2" x 6" cross members
- Adjustable Snow Diverter
- 3" x 10" Cylinders
- 3/8" Thick Pan
- Extended Sides to hold more snow
- Road tires (225-75-R15) and Machined Axles with Greaseable Hubs
- LED Strobe Light
- Shotblasted, primed, and painted
- Transport Locks
- 1 year warranty (on workmanship)

Ultimate Roller

## ULTIMATE ROLLER

- 42" Culvert
- 30" UTV Option
- Fully Enclosed Frame
- 2" x 3" Tube Frame
- Adjustable Scraper Bar
- Adjustable Pintle Hitch
- 2" Greaseable bearings on the Drum with sealed tube for bearing connection
- Parking Stand
- 3" x 10" Cylinder
- Replaceable Drum Wheel Wear Segments - Smooth or Serrated
- 15" Tires with high speed greaseable bearings
- Slow Moving Vehicle Sign
- 6" Oval Strobe - Rearward Facing
- Work Light
- Transport Locks
- Available in 8ft, 9ft, and 10ft sizes (Additional sizes available upon request.)

# ULTIMATE JUNIOR SNOW GROOMER DRAG

We are proud to share that we have launched the new Ultimate Junior Groomer Drag – this ultra-small trail groomer drag shares the same proven design of the original Ultimate Groomer Drag while offering the versatility of a self-contained power unit to be towed by any tow vehicle with a receiver hitch. The mini snow groomer includes a self-contained power unit that is housed in a high-quality lockable aluminum tool box with 2 batteries, trickle charger and mounting for the antenna to work with its wireless controller.

## Features & Specifications

- Design based off of proven full sized Ultimate Groomer, reinforced at critical points
- 1/4" thick wall structural steel tube & 1/4" thick stiff hitch, fully enclosed
- Hardened wear strips at 3 critical points along side rails
- 10" of Ground clearance when raised
- 2" Trailer Hitch w/ Rubber Puck to absorb shock
- Extendable Hitch w/ up to 9" extension, shear bolt protected
- Heavy Duty Front/Side Bumper
- Removable Top Crank Parking Stand
- 4 Adjustable Spring Loaded Cutting Blades (Front Serrated, Rear Smooth) (Adj. Tension)
- Cutting Blades angled & positioned for increased flow of snow, cutting mogels, & easier pulling
- Removable pins for every blade holder
- Fixed Position snow diverter after the 4th blade
- Grease zerks on every blade holder pivot point
- 3/16" Pan, 3 bends for added strength, Integrated pull loop
- 3 Adjustable Pan Guide Runners (Hardened Material)
- Tires (18.5" – 8.5" – 8") & Greaseable Hubs
- Aluminum Diamond Plate Toolbox with Reinforced Floor and Angled Weather Proof Lid
- Wireless Controller
- 2 Deep Cycle Battery w/ battery charger
- Heavy Duty Hydraulic Hose, 4000psi
- LED Strobe Light w/ waterproof connection
- LED Work Light with waterproof connection
- Rubber Pan Flap (bolt on)
- Primed and painted
- 1 year warranty (on workmanship)
